# Terms and General Conditions of Delivery

Prices quoted in this list go into effect immediately for spot sales and 1956 crop contracts, superseding all previous quotations. All orders of 4 ounces or over will be charged at the pound rate; all orders under 4 ounces will be charged at the ounce rate.

The minimum charge for each item billed will be seventy-five cents, due to the increased cost of handling small orders.

All seeds are quoted F.O.B. El Monte, California, terms 60 days net, less 1% cash 30 days. All invoices payable in U. S. dollars in or by New York or Los Angeles Exchange. All overdue accounts subject to sight draft without further notice.

Bags and containers will be charged at cost and are not returnable.

We reserve the right to change any or all prices in this list without notice.

In case of crop shortages, orders will be filled pro rata only.

Crop failure or any cause beyond our control releases us entirely from delivery.

BODGER SEEDS LTD. warrants to the extent of the purchase price that seeds or bulbs sold are as described on the container, within recognized tolerances. Seller gives no other or further warranty, express or implied.

Should fulfillment of any order or contract be prevented or delayed by the act of God, war, blockade, revolution, prohibition of exports or imports, riots, strikes, lockouts, fires, loss and/or detention at sea or any other contingency beyond our control, we shall not be responsible for any loss and/or damage thereby.

---

## *extra* MAY WE BE OF SERVICE?

**EKTACHROMES:** If you need Ektachromes for full color reproduction purposes (either letterpress engravings or lithographic separations) we can supply high quality color photographs on a loan basis, the Ektachrome to be returned after use. MADE UP TO ORDER ONLY. Please allow two weeks for completion of your order.

4 x 5 inches ..... Each Subject \$ 6.75

8 x 10 inches ..... Each Subject 10.00

**PHOTOGRAPHS:** We can supply, at cost price to us, professional quality photos of (1) all varieties of which we offer seed, (2) most varieties we have listed in recent years, and (3) certain subjects we do not normally grow; usually several poses of each subject. All photos are 8"x10" contact, single weight glossy paper. . Each \$1.00

**KODACHROME SLIDES:** We can supply high-fidelity 35mm slides (2" x 2") of any subject listed under "Color Photographs." These are close-ups of individual flowers or groups, projected from our professional-size originals. .... Each \$ .50

(Continued on next page)

## MAY WE BE OF EXTRA SERVICE?

**HORTICULTURAL COLOR CHART:** This is the most complete and useful compilation of horticultural colors available in the world. Assembled in two volumes of individual, unbound sheets which greatly facilitate color matching, the set is issued in collaboration with the Royal Horticultural Society and includes 200 pages with four graded tones of color on each page — a total of 800 different color blocks. The descriptive material includes equivalent color names in four other systems (such as Ridgeway), the synonyms in six foreign languages, and horticultural examples (for instance, color block 640/2 represents the color seen in *Scilla campanularia*). In the Bodger catalog the sweet peas, which are frequently distinguished by minor color differences, are adequately described by one or two sets of figures taken from this color chart.

For the immense versatility and wide acceptance in horticulture the price is very low. Complete set of two volumes, just. . . . . \$12.00

**ELECTROS:** We can supply electrotypes for use in printed matter of a great number of the pictures offered above. 120 screen, usually square finish. Chosen from our Electro Catalog, our seed catalogs, or a selection of photos, and **MADE UP TO ORDER ONLY**. Allow ten days for completion of your order. Prices below apply to copper. For nickelsteel, add 25%.

**COLOR PLATES:** We have a large selection of color plates available. 120 screen, square finish, vinyl mold nickelsteel. Chosen from our Electro Catalog, our seed catalogs, or proofs submitted, and **MADE UP TO ORDER ONLY**. Allow ten days for completion of your order.

**ELECTROS AND COLOR PLATES ARE SUPPLIED UNMOUNTED (PATENT BASE) UNLESS MOUNTING IS SPECIFICALLY REQUESTED. THERE IS AN ADDITIONAL CHARGE OF 25% FOR MOUNTING.** If we do not have an electro the size you need, you can purchase a photo and have your printer make a cut for you. Electro Catalog available free.

### ELECTRO PRICES ARE AS FOLLOWS:

Note: OUR ELECTRO PRICES DIRECTLY REFLECT THE STANDARD ELECTROTYPYER'S SCALE IN LOS ANGELES, WHICH IN TURN REFLECTS THE HIGH WAGES NOW PAID IN THE ENGRAVING INDUSTRY. WE CANNOT CONTROL THIS. BEFORE ORDERING, CONSULT YOUR PRINTER. IN SOME LOCALITIES HE MAY BE ABLE TO HAVE ENGRAVINGS MADE AT LOWER COST THAN OUR PRICES.

# THE STORY OF BODGER'S WILT-RESISTANT ASTERS

For hundreds of years horticulturists have developed the China Aster until it is one of the most colorful of the late summer annuals. About twenty years ago, however, the disease Aster Wilt became so widespread that it threatened the very existence of the Aster family. The problem was this: Wilt is caused by the fungus *Fusarium conglutinans* var. *Callistephi*, which lives in the soil. It may be spread by tools, water, seed—and it persists almost indefinitely. It may be avoided by using soil that has never grown Asters before, but this course is usually impractical. There is at present no drug or chemical which will destroy it. How, then, is Aster Wilt conquered?

The process developed by Bodger Seeds Ltd. in its pioneer work is much like vaccination in human beings: Plants are exposed to the Wilt and those which survive supply seed for the next generation of test plants. This work is carried on in the Wilt Workshop, a twenty-acre farm staffed by Bodger experts which is devoted solely to wilt work and is purposely infected with as much wilt as possible.

The tendency to wilt-resistance can be inherited, so the plants grown from the seed produced the previous year are quite resistant—but the process does not stop there. Many successive generations are grown in the Workshop until the best lines have great resistance. By means of this technique—survival of the fittest—Bodger's original strains of wilt-resistant Asters were developed.

In all cases it is **resistance**, not **immunity**, which is developed. The tendency toward resistance is inherited, and will "breed out" if the strain is not put through the Workshop cycle periodically. All Bodger Aster introductions are developed in the Workshop, and each year's stock seed comes directly from a two-generation exposure to wilt of a virulence not found in ordinary soil. Your Bodger Aster seed is highly resistant. Even a few generations of increase in non- or lightly-infected soil will produce seed of decidedly less resistance.

Resistance is hereditary, and so are plant and flower types. Bodger wilt-resistant strains are developed from non-resistant, **Commercial** varieties, quite true to type—not from crosses between commercial and inferior, though resistant, types. Because we take pride in maintaining this accuracy of type, some varieties are not offered as wilt-resistant. At present we cannot make these resistant without sacrificing essential qualities of type, and we do not recommend their use where wilt has been observed. Combining wilt-resistance with good commercial types is not easy, since there will always be some variation. Resistance is expressed as a percentage, a high value of which is required to qualify as "wilt-resistant."

The war against wilt is a continual one, complicated by bad weather breaks which sometimes wipe out a long chain of selection work. Among commercial growers, Bodger Seeds Ltd. is the pioneer in wilt work, and the only firm actively engaged in continual research. Your Bodger wilt-resistant Aster seed is of high quality, true to type, and as wilt-resistant as we can make it. Because of this research work, wilt is no longer a problem to the careful grower who makes sure he has resistant stock.

# Asters

All Asters listed here can be grown by the home gardener wherever Asters are popular. The non-resistant Giants require care to avoid wilt infested ground, but yield tremendous "show" blooms for the careful gardener. Most of these Asters are also in great demand as florist's commercial varieties, especially those marked "f". In any case, seed we offer is of highest florist quality.

## PRINCESS ASTERS (BODGER)

An ideal type for florists, suitable also for home gardens. Flowers have crested center that remains full when flower is completely open, surrounded by multiple rows of guard petals.

### ASTER BEDDING PRINCESS WILT RESISTANT (Marsha type)

New, compact branching plant form (identical with that of the variety Princess Marsha) 20"-24" high, completely covered with 3" true Princess flowers when plants bloom in late August. Long stemmed blooms keep excellently when cut, while plants provide the best garden landscaping color when planted at 9" spacing.

		Per oz.	Per lb.
....890	AZURE BLUE .....	2.00	20.00
<b>NEW</b> ....894	CRIMSON .....	2.00	20.00

<b>NEW</b> ....924	FINEST MIXED .....	2.00	20.00

### ASTER PRINCESS WILT RESISTANT (f) (Tall branching strain)

The standard tall branching Princess Aster that has been used by florists since our introduction of the type 20 years ago. 2'-2½' plants bear long-stemmed 3"-3½" flowers blooming in late August. For home garden use we suggest the new Bedding type above.

....818	ALICE, bright azure blue .....	2.00	20.00
....816	BARBARA, orchid .....	2.00	20.00

## ASTER SUPER GIANT WILT RESISTANT (f) (Bodger) (new)

The long-awaited wilt resistant strain of true giant ostrich-feather flowers with long, heavy non-lateral stems, borne on plants 3' high. Blooms late summer to frost. The best giant Aster.

Per oz. Per lb.

....146	BEVERLY HILLS (Bodger), azure blue.....	2.50	25.00
....148	EL MONTE Wilt-Resistant (Bodger),  '36 crimson .....	2.50	25.00

### ZINNIA SUPER CROWN O'GOLD (f) (Bodger)

....1330	PASTEL TINTS (Bodger). Vastly improved strain of the Crown O'Gold type, with large well-formed flowers in rich pastel shades, each petal overlaid at the base with deep golden yellow. Flower type intermediate between Dahlia Flowered and California Giant.....	.80	6.50
----------	--	-----	------

### ZINNIA BODGER'S CALIFORNIA GIANT or MAMMOTH (f) (Bodger)

Introduced by us in 1926; most of the colors are of our introduction since then. This class makes fine cut flowers, especially for florists, as they can be forced nicely in the greenhouse. Flowers large and flat with long stems, very graceful. Colors which do not occur also in the Dahlia Flowered class are marked with an asterisk (\*).

....1350	BRIGHTNESS, bright pink.....	.85	7.00
....1382	*CHERRY (CERISE) QUEEN, cherry rose.....	.85	7.00
....1380	CRIMSON QUEEN, rich crimson.....	.85	7.00

# Marigold African

(Tagetes Erecta)

## GIANT FLOWERED TYPES

### MARIGOLD GIGANTEA (Bodger) (a)

Strong growing plants 3½' tall, bearing huge ruffled, tightly petaled peony-flowered blooms; the largest of any Marigold.

		Per oz.	Per lb.
....4986	FULL DOUBLE MIXTURE, as above, all colors	1.00	8.00
....4994	ORANGE SUNSET, huge pure orange.....	1.00	8.00
....4998	EARLY SUNSET GIANTS, standard giant Marigold, in orange, gold, canary, lemon and primrose .....	.95	7.50

## CRACKERJACK

The front and back covers of this catalog are devoted to the new, giant flowered marigold Crackerjack. The illustration faithfully reproduces three of the colors and the type of flower but what it fails to do is to indicate the immense size of these blooms. Right down the row you can measure bloom after bloom that exceeds 5 inches in diameter, and it is not surprising to have them reach 6 inches from time to time.

The plants differ from Sunset Giants by being much more compact, growing only 30 to 36 inches tall, by flowering weeks earlier than Sunset Giants, distinctly earlier than any other giant flowered type, and by their admirable habit of carrying the blooms in full view instead of having them buried in the foliage. This results in a covered-with-flowers feeling normally reserved for the dwarf types and makes them really glow with color.

The flowers themselves have much to recommend them besides their size. In spite of that size they are neat, refined, symmetrical, and durable beyond belief both on the plant and as an impressive cut flower. The Crackerjack series of colors includes the full marigold range, running from primrose through yellow to gold and finally to brilliant orange.

Bred by Bodger's advanced, new breeding methods, Crackerjack overcomes the objectionable percentage of single flowers so noticeable in Sunset Giants.

Crackerjack has all the ingredients of success. It is easy to grow, universal in adaptability, of a popular flower class, produces lots of big flowers suitable for cutting, blooms over a long period of time, and has a name gardeners will be able to remember easily when they read about it in newspapers and magazines.

We suggest you place your order now while you are thinking about it to be able to fill your customers requests when the publicity breaks.

....4996	CRACKERJACK (1956 crop only) .....	\$1.50	\$15.00
----------	------------------------------------	--------	---------

## MEDIUM FLOWERED TYPES

### MARIGOLD CARNATION FLOWERED (a)

Loosely petaled flowers 3" or more across, borne on 2'-2½' plants.

## THE CONTINUING STORY OF CARNIVAL

®

With the crop offered this year Carnival is in its second season, and it appears that its success is assured on a national basis.

Of course the major factor in its success is the fact that it is a top notch grandiflora petunia mixture, far exceeding anything of its type yet offered in vigor, floriferousness, range of color and low cost. But also a strong influence is the fact that virtually every gardener in the country has heard about it not once but a number of times. He saw it on magazine covers, read feature articles about the method of breeding, ran across it in newspaper columns and both heard and saw it expounded on radio and TV. A large number of catalogs gave it a featured position, while first quality colored packets faced the prospect along with big posters in his garden store.

Carnival owes its existence to Gregor Mendel and his theory of heredity. To quote right from the book, here's the key: "... ancestral characteristics are transmitted independently to the offspring, certain characteristics being dominated or overcome by antagonistic characteristics in the first generation, **but both dominant and recessive characteristics appearing in the second generation in a fixed proportion.**"

And that just means that we have taken advantage of the fact that if you know the parents you can predict exactly what will happen in F<sub>2</sub> segregation, and if you plan your first crosses carefully you can end up with a color range impossible to attain in any other way. You can count 20 different colors in a moderate sized planting of Carnival, and that's really something in petunias! Colors include blue, white, crimson, rose, carmine, scarlet, salmon, salmon-pink, brilliant rose, light pink, red, rosy lavender, and cream-pink in solid colors. Then there are bicolored flowers combining white and pink, white and blue, or white and rose. But beyond even this array are the intermediate tones, one grading into the next in such a way that eventually the eye refuses to separate them any longer but still appreciates the chromatic variety.

The flowers are large, measuring 3 to 4 inches across, with fringed and ruffled petal edges of the typical grandiflora type. As in regular grandifloras there are some smaller, plain edged flowers but these together with intermediate segregates total no more than 20% and are hard to find in the mass of large blooms.

The plants are of regular dwarf bedding type, and have the vigor to maintain a mass of bloom during a protracted period, in our own trials continuing unabated for fully three months.

Give Carnival a featured position among your flowers; it deserves it and will repay you richly.

# *Sweet Peas*

With the continually increasing number of sweet pea types being introduced there is inevitably a certain amount of confusion between classes. To make the types as clear as possible and to introduce new classes in their proper position, we summarize here the three broad classifications of early, spring and late with the new Zvolanek types in their proper location.

## **EARLY (Winter Flowering)**

This group of sweet pea varieties includes only those which will flower under short-day conditions. In mild climates these are fall-planted for bloom from Christmas onward. In areas with severe winters they are planted as early as possible in the spring and provide the first flowers, although not nearly so much earlier as when fall planted. The usual series in this class is the **Early or Winter Flowering Spencer**, and a very wide range of colors is available in this group. Newer, and more vigorous in plant as well as carrying more florets per stem is the **Zvolanek Multiflora** series.

## **SPRING**

The **Cuthbertson Spring Flowering** group is well known for its greater vigor and greater heat resistance than comparable maturities. While this is not a short-day type and will not be rushed into bloom even in mild climates until the days become long enough, it does provide the best answer to reliable sweet pea crops where spring planting is the rule and where early summer heat is a hazard. **Cuthbertson Floribundas** are the newer, stronger varieties in this class. **Zvolanek Floribundas** belong in this same maturity class, and their characteristically longer, stronger stems and greater number of florets per stem make them a very interesting and worth-while addition to the sweet pea family. These are very new and in limited distribution as yet. Both types bloom about 2 weeks earlier than the late flowering types.

## **LATE (Summer Flowering)**

Where cool weather persists during the summer this group is the most satisfactory for it has the largest plants and produces the heaviest crops of all. The standard strain is **Late or Summer Flowering Spencer**, and a long list of varieties is available. In this same classification is the brand new **Zvolanek Plentiflora** series. This type is available only in mixture this year, but they exhibit the same advantage in number of florets in comparison with the Spencers as the other, earlier Zvolanek introductions.

---

The numbers in parenthesis following Sweet Pea descriptions refer to color chart readings. See page 3.

**SWEET PEA EARLY or WINTER FLOWERING SPENCER (af)**

## SWEET PEA ZVOLANEK MULTIFLORA (af)

A garden sweet pea more vigorous than any other, yet true winter flowering for florists. Under ideal conditions Multifloras produce longer and stronger stems, larger florets and more of them. Under any conditions they produce an average of two more florets per stem than the strain you're now using. We recommend this.
